TITLE: Conc. surfactant compsn. - comprises a mixt. of
water and 30-55 wt. per
cent of surfactant and is capable of exhibiting hexagonal
symmetry by X-ray
diffraction etc.

RELATED-ACC-NO: 1993-078275

ABSTRACTED-PUB-NO: EP 452106A

BASIC-ABSTRACT: A surfactant compsn. comprises a mixt. of water and 30-55 wt.% of surfactant based on total wt. of surfactant and water. The compsn. is capable of exhibiting hexagonal symmetry by small angle X-ray diffraction and/or neutron scattering and is pourable when subjected to shear. Also claimed is liquid detergent compsn. comprising the surfactant, and a stable spherulitic surfactant compsn..

USE/ADVANTAGE - The surfactant systems comprise high levels of surfactant and are particularly useful in preparing highly concentrated liquid laundry detergents which are environmentally friendly and have good washing performance. The conc. liquids compete effectively with ''compact'' powders. The surfactant systems contain stably suspended solid builders at acceptable viscosities. The compsn. contg. suspended particles can be a scouring cream, pesticidal compsn. or drilling mud.

ABSTRACTED-PUB-NO: EP 452106B

EQUIVALENT-ABSTRACTS: A surfactant compsn. comprises a mixt. of water and 30-55 wt.% of surfactant based on total wt. of surfactant and water. The compsn. is capable of exhibiting hexagonal symmetry by small angle X-ray diffraction and/or neutron scattering and is pourable when subjected to shear. Also claimed is liquid detergent compsn. comprising the

surfactant, and a stable
spherulitic surfactant compsn..

USE/ADVANTAGE - The surfactant systems comprise high levels of surfactant and are particularly useful in preparing highly concentrated liquid laundry detergents which are environmentally friendly and have good washing performance. The conc. liquids compete effectively with ''compact'' powders.

The surfactant systems contain stably suspended solid builders at acceptable viscosities. The compsn. contg. suspended particles can be a scouring cream, pesticidal compsn. or drilling mud.

US 5952285A

The compsns. comprise water, surfactant, and sufficient surfactant-desolubiliser (I) to form a stable spherulitic or G-phase liq. crystal structure. Compsns. comprising solid or liq. particles suspended in compsn. of type (A) are also new.

Pref. the surfactant component is mixt. of 20-75 wt.% of a relatively soluble surfactant, esp. alkyl ether sulphate or alkyl ether carboxylate, and 25-80 wt.% of relatively insol. surfactant, esp. Na alkylbenzene sulphonate and/or an Na soap. (I) is alkali metal carbonate. Liq. detergent compsns. comprise water, 10-15% Na alkyl ether sulphate, 4-10% Na alkylbenzene sulphonate or Na alkyl sulphate, 0-6% soap, 0-3% ethoxylated nonionic surfactant and 8.5-12% Na₂CO₃ or K₂CO₃.

USE/ADVANTAGE - Compsns. of type (A) are useful laundry detergents. Compsns. of type (B) are useful as scouring creams (contg. abrasive particles), pesticidal compsns. (contg. isoluble pesticide), drilling muds (contg. shale and/or weighting agent), detergents (contg. builders, esp. zeolite), or

cosmetic or topical pharmaceutical compsns. (contg.
exfoliants, oils,
anti-dandruff agents, sunscreens, emollients,
antiperspirants, styptics,
antiseptics, insect repellants, pearlisers, waxes,
microsponges, etc.). Dye
dispersions, printing pastes and functional fluids (e.g.
lubricants, cutting
fluids, hydraulic fluids or heat-transfer fluids) are also
disclosed. Addn. of
(I) allows pourable compsns. to be prepd. at high
surfactant concns. normally
resulting in non-pourable

RELATED-ACC-NO: 1991-305108

ABSTRACTED-PUB-NO: EP 530708A

BASIC-ABSTRACT: The compsns. comprise water, surfactant, and sufficient surfactant-desolubiliser (I) to form a stable spherulitic or G-phase liq. crystal structure. Compsns. comprising solid or liq. particles suspended in compsn. of type (A) are also new.

Pref. the surfactant component is mixt. of 20-75 wt.% of a relatively soluble surfactant, esp. alkyl ether sulphate or alkyl ether carboxylate, and 25-80 wt.% of relatively insol. surfactant, esp. Na alkylbenzene sulphonate and/or an Na soap. (I) is alkali metal carbonate. Liq. detergent compsns. comprise water, 10-15% Na alkyl ether sulphate, 4-10% Na alkylbenzene sulphonate or Na alkyl sulphate, 0-6% soap, 0-3% ethoxylated nonionic surfactant and 8.5-12% Na₂CO₃ or K₂CO₃.

USE/ADVANTAGE - Compsns. of type (A) are useful laundry detergents. Compsns. of type (B) are useful as scouring creams (contg. abrasive particles), pesticidal compsns. (contg. insoluble pesticide), drilling muds (contg. shale and/or weighting agent), detergents (contg. builders, esp. zeolite), or cosmetic or topical pharmaceutical compsns. (contg. exfoliants, oils, anti-dandruff agents, sunscreens, emollients, antiperspirants, styptics, antiseptics, insect repellants, pearlisers, waxes, microsponges, etc.). Dye dispersions, printing pastes and functional fluids (e.g. lubricants, cutting fluids, hydraulic fluids or heat-transfer fluids) are also disclosed. Addn. of (I) allows pourable compsns. to be prepd. at high surfactant concns. normally resulting in non-pourable

ABSTRACTED-PUB-NO: EP 530708B

EQUIVALENT-ABSTRACTS: The compsns. comprise water,

surfactant, and sufficient
surfactant-desolubiliser (I) to form a stable spherulitic
or G-phase liq.
crystal structure. Compsns. comprising solid or liq.
particles suspended in
compsn. of type (A) are also new.

Pref. the surfactant component is mixt. of 20-75 wt.% of a
relatively soluble
surfactant, esp. alkyl ether sulphate or alkyl ether
carboxylate, and 25-80
wt.% of relatively insol. surfactant, esp. Na alkylbenzene
sulphonate and/or an
Na soap. (I) is alkali metal carbonate. Liq. detergent
compsns. comprise
water, 10-15% Na alkyl ether sulphate, 4-10% Na
alkylbenzene sulphonate or Na
alkyl sulphate, 0-6% soap, 0-3% ethoxylated nonionic
surfactant and 8.5-12%
Na₂CO₃ or K₂CO₃.

USE/ADVANTAGE - Compsns. of type (A) are useful laundry
detergents. Compsns.
of type (B) are useful as scouring creams (contg. abrasive
particles),
pesticidal compsns. (contg. isoluble pesticide), drilling
muds (contg. shale
and/or weighting agent), detergents (contg. builders, esp.
zeolite), or
cosmetic or topical pharmaceutical compsns. (contg.
exfoliants, oils,
anti-dandruff agents, sunscreens, emollients,
antiperspirants, styptics,
antiseptics, insect repellants, pearlisers, waxes,
microsponges, etc.). Dye
dispersions, printing pastes and functional fluids (e.g.
lubricants, cutting
fluids, hydraulic fluids or heat-transfer fluids) are also
disclosed. Addn. of
(I) allows pourable compsns. to be prepd. at high
surfactant concns. normally
resulting in non-pourable

GB 2259519B

A pourable composition which comprises: a mixture of water
and surfactant
having a concentration such that when a

surfactant-desolubiliser is progressively added to said mixture the electrical conductivity passes through a minimum value characterised by the formation of a G-phase composition and a subsequent minimum at higher surfactant-desolubiliser concentration than said first minimum and characterised by the formation of a turbid spherulitic composition; and a quantity of dissolved surfactant-desolubiliser, such as a surfactant desolubilising electrolyte, greater than that corresponding to said first minimum but less than that corresponding to said subsequent minimum and sufficient to form a stable composition capable of suspending solid.

US 5952285A

The compsns. comprise water, surfactant, and sufficient surfactant-desolubiliser (I) to form a stable spherulitic or G-phase liq. crystal structure. Compsns. comprising solid or liq. particles suspended in compsns. of type (A) are also new.

Pref. the surfactant component is mixt. of 20-75 wt.% of a relatively soluble surfactant, esp. alkyl ether sulphate or alkyl ether carboxylate, and 25-80 wt.% of relatively insol. surfactant, esp. Na alkylbenzene sulphonate and/or an Na soap. (I) is alkali metal carbonate. Liq. detergent compsns. comprise water, 10-15% Na alkyl ether sulphate, 4-10% Na alkylbenzene sulphonate or Na alkyl sulphate, 0-6% soap, 0-3% ethoxylated nonionic surfactant and 8.5-12% Na_2CO_3 or K_2CO_3 .

USE/ADVANTAGE - Compsns. of type (A) are useful laundry detergents. Compsns. of type (B) are useful as scouring creams (contg. abrasive particles), pesticidal compsns. (contg. insoluble pesticide), drilling muds (contg. shale and/or weighting agent), detergents (contg. builders, esp.

zeolite), or
cosmetic or topical pharmaceutical compsns. (contg.
exfoliants, oils,
anti-dandruff agents, sunscreens, emollients,
antiperspirants, styptics,
antiseptics, insect repellants, pearlisers, waxes,
microsponges, etc.). Dye
dispersions, printing pastes and functional fluids (e.g.
lubricants, cutting
fluids, hydraulic fluids or heat-transfer fluids) are also
disclosed. Addn. of
(I) allows pourable compsns. to be prepd. at high
surfactant concns. normally
resulting in non-pourable
